

SOLUTION BRIEF

Axway Managed File Transfer. Powering mission-critical business.

Simplify MFT and deliver business value with scalable, flexible solutions you can deploy anywhere.

Secure data and file transfer for a data-driven world

Axway Managed File Transfer gives you a secure, reliable, and easy-to-manage solution for transferring data between people, partners, businesses, and applications. Your data and files stay protected and comply with regulations such as HIPAA, PCI, DSS, and GDPR. Axway MFT empowers business users to move data faster to meet the demand for real-time applications across industries.

Axway MFT key benefits

Gain the advantages of an MFT solution that lets you manage all your critical data transfers from a single point of control.

Security

Enjoy centralized control of the entire MFT ecosystem via a single administration console. Predictive monitoring and alerts help you monitor file transfers so you can ensure you meet your service level agreements and avoid security-related incidents.

Speed

Decrease the time it takes to create and deploy file transfers by up to 90 percent. Business users can easily create file transfer services, subscribe partners, and manage file transfers safely without requiring IT assistance, reducing bottlenecks, and increasing business agility.

Simplicity

Create and publish prepopulated templates for various file transfer flows. Empower business users with easy-to-use, self-service capabilities for creating new file transfers with customers and partners.

Automation

Take advantage of automated workflows to encrypt and transfer files according to your organization's requirements.

Compliance

Ensure compliance by protecting files, leveraging granular visibility and control of the entire MFT ecosystem, and delivering complete audit trails for data residency and access.

Integration

Integrate administrative, flow management, and governance capabilities into third-party custom applications or IT Service Management solutions using a comprehensive set of REST APIs.

“

Relationship and partnership were and still are essential factors in maintaining Axway as our strategic MFT supplier.

Rodrigo Nardoni, CIO at B3

[B]³

Scalability

Control all aspects of your MFT ecosystem via a single administration console for deployment, configuration, and management. You can deploy Axway Managed File Transfer anywhere as a subscription service on-premises, in a private cloud, public cloud, hybrid cloud, or in the Axway Managed Cloud.

Visibility

Monitor system health, ensure security, and track files with a consolidated view of your Axway MFT products.

BOLSTER YOUR BUSINESS GROWTH

Innovate with smarter, more powerful components and capabilities:

- Use APIs to produce new services by integrating file transfers into business applications
- Securely unlock content to create new experiences for person-to-person sharing and collaboration
- Reuse existing MFT templates to establish business with new partners within minutes

The screenshot displays the 'Transfer CFT' administration console interface. The top navigation bar includes 'Home', 'Operations', 'General Configuration', 'Flow Definitions', 'Security', and 'Transfer CFT API'. The main content area is titled 'Transfers' and contains a table of transfer records. The table columns include IDTU, Creation Timestamp, Partner, Frame, Type, Mode, Direction, IDF, IDT, Ack, DIAG, DIA, % Progress, Phase, Step, and Sentinel State. The table shows various transfer statuses, including 'COMPLETED' and 'CANCELED'.

IDTU	Creation Timestamp	Partner	Frame	Type	Mode	Direction	IDF	IDT	Ack	DIAG	DIA	% Progress	Phase	Step	Sentinel State

Axway MFT products

From centralized flow governance to embedded analytics, Axway MFT gives you total control over your mission-critical data and file transfers.

SecureTransport

Axway SecureTransport is the most scalable and resilient MFT gateway for data movements on the market, with fault-tolerance and high availability to meet the critical file transfer needs of your organization.

Transfer CFT

Axway Transfer CFT takes the complexity out of integrating applications across platforms, operating systems, and locations. Build critical, high-volume, application-to-application data flows with a multiplatform, multisite file transfer controller.

Intelligent MFT

Axway Intelligent MFT is a purpose-built solution that can be used by your existing teams to build with no code new data flows and automate end-to-end processes to respond faster to customers and partners, improve efficiency, and reduce the burden on IT and business resources.

Managed Cloud Services

Axway Managed Cloud Services gives you the power of a cloud platform with the business and technical expertise of a world-class team. Reduce operational costs by letting our experts manage your MFT environment in a highly secure cloud environment.

Workbench

Axway Workbench provides centralized, ecosystem-wide visibility, observability, and operational control across the Axway SecureTransport and Transfer CFT products—plus a modern user experience.

Sentinel and Embedded Analytics

Axway Sentinel and Embedded Analytics for SecureTransport provides ultimate control by letting you see into your file transfers and respond faster to fluctuations. Proactively identify file-transfer issues and substandard partner experiences, configure alerts to ensure you meet your service level agreements, and resubmit file transfers to keep your business running.

“

Axway Managed File Transfer is truly the cornerstone of our data flow architecture. The solution monitors the health of our infrastructure and gives end-to-end visibility of our data flows – two critical capabilities for such a mission-critical system.

Alexandre Casanova, Systems and Networks Administrator at AG2R LA MONDIALE

AG2R LA MONDIALE

Transition Portal

Easily transition from legacy MFT solutions by assessing your current flows, enriching them, and writing them to Flow Manager using predefined template.

Secure Client

Axway Secure Client is an end-point solution to establish secure and direct connections with your partners, suppliers, customers, and employees over the Internet – quickly, efficiently, and reliably.

SECURE YOUR BUSINESS

Protect data and minimize business risk with granular visibility:

- Control your entire MFT ecosystem with centralized configuration and administration
- Correct issues before they impact business with analytics in Sentinel and Embedded Analytics
- Ensure data residency and content access to comply with full governance and auditing

The screenshot displays the Workbench interface. On the left is a navigation sidebar with options: Home, Transfers, Products, Automation, Users, and Dashboard. The main content area is titled 'Product Health' and includes a search bar, filters for 'Products' (All, In Error) and 'Group by' (Product Type, Environment, OS, Version). Below this is a 'SecureTransport' status indicator and a 'Transfer CF' indicator. The 'External Connections' section features a 'Total Connections' line chart showing success and failure rates over time, and a 'Logons by File Type' section with area charts for SFTP, FTPS, HTTPS, and AS2. A 'Create New Automation' modal is overlaid on the right, offering templates such as 'Detect Missing Transfers', 'Detect Incorrect Files Count', 'Detect Duplicate Files', 'Negative Ack Received', 'Notify of Transfer Status', 'Notify of File Delivered', 'File Size Mismatch', 'No File Received Since', and 'Notify of File Arrival'.

Compatible with your partners and processes

Axway Managed File Transfer offers out-of-the-box connectors and support for a wide range of operations and protocols. Engage your customers and partners across any channel or deployment model using a single solution. Axway shares the delivery accelerators, best practices, and expertise to accelerate your time to value.

Scale with confidence

Axway MFT supports the largest file transfer systems in the world and the widest variety of integration patterns.

Experienced experts

We're here to help you achieve your desired outcomes – faster, smarter, and better.

Deploy your way

Manage your file transfers easily and securely on-premises, in a private or public cloud, or the Axway Managed Cloud.

Rapid deployment and update

Implement containerized deployments for zero downtime updates and upgrades with centralized configuration and administration.

The screenshot shows the 'ST Web Client' interface. At the top left is the logo and 'ST Web Client'. At the top right is a user profile for 'John Smith' with initials 'JS'. Below the header, there's a breadcrumb 'Your Files > demoux'. There are 'Upload' and 'Actions' buttons on the left, and a 'View' button on the right. The main content is a table with three columns: 'Name', 'Last modified', and 'Size'. The table contains four rows of CSV files, each with a progress bar. The first row is '01-January critical payment.csv (Waiting)' with 0 bytes. The other three rows are for February, March, and April, all with a last modified date of 9/7/2023, 3:19:54 PM and sizes of 7.27 MB, 6.61 MB, and 2.64 MB respectively.

Name ↑	Last modified	Size
01-January critical payment.csv (Waiting)		0 bytes
02-February critical payments.csv	9/7/2023, 3:19:54 PM	7.27 MB
03-March critical payments.csv	9/7/2023, 3:19:54 PM	6.61 MB
04-April critical payments.csv	9/7/2023, 3:19:54 PM	2.64 MB
